

# WorkshopPLUS – Microsoft Intune: Managing iOS and Android

## WorkshopPLUS

**Duration:** 1 Day [Remote]

**Difficulty Level:** 200 - Intermediate

## Description

This intensive one-day workshop provides you with a concentrated learning experience, which empowers you to proficiently use Microsoft Intune for streamlined iOS and Android device management within your organization. You will gain expertise in enrolling, configuring, and effectively monitoring iOS or Android devices through the intuitive features of Intune.

## Objectives

- Acquire proficiency in utilizing the Intune MDM and MAM capabilities for iOS and Android.
- Gain insights into diverse enrollment choices available for iOS and Android devices.
- Attain a comprehensive understanding of device configuration profiles and their effective management.
- Acquire knowledge about device compliance policies and their significance.
- Understand the application of Application Protection Policies in a MAM-only context for enhanced data security.

## Outcomes

You will develop a solid grasp of Intune core concepts, which includes secure device enrollment, efficient application deployment, policy implementation, and best practices for effective iOS and Android device management using Intune.

## Methodology

The workshop will be delivered through live presentations and interactive demonstrations. You will gain insights and practical understanding through detailed explanations, visual aids, and real-time demos showcasing Intune features and functionalities.

## Agenda

### Introduction and Enrolment (2 hours)

- Workshop Objectives and Agenda Overview
- Introduction to Intune and Modern Device Management
- Exploring Secure Device Enrolment into Intune

### Application and Policy Management (3 hours)

- Efficient Application Deployment using Intune
- Configuring Profiles for Effective Management
- Ensuring Device Compliance with Security Settings

### App Protection Policies and Q&A (2 hours)

- App Protection Policies for Data Security
- Role of Conditional Access Policies
- Interactive Q&A

## Delivery Outline

### Requirements

#### Participants

Previous experience with Windows operating systems and basic device management concepts.

**Note:** This workshop is tailored for participants with prior Windows management experience who aim to elevate their skills in device management using Microsoft Intune.

#### Delivery Requirements

Access to a device with a stable internet connection for engaging in live presentations and demos.

#### Time Commitment

Full-day availability for active participation.

### Topics covered

#### Device Enrollment (2 hours)

- Workshop Introduction and Objectives
- Exploring Intune Capabilities for iOS and Android Management
- Navigating Enrollment Methods for iOS and Android Devices (Personal and Company Owned)
- Automated Device Enrollment (formerly DEP) for Apple Devices
- Using the Intune Company Portal for Device Enrollment

#### Profile Management and App Deployment (2 hours)

- Understanding Device Groups and Device Filters
- Reviewing Various Device Configuration Profiles for iOS and Android Devices
- Understanding Device Compliance Policies
- Exploring Different Application Type available for iOS and Android.
- Deploying Applications to iOS and Android Devices using Intune
- Using the Apple Volume Purchase Program (VPP) for App Distribution

#### App Protection Policies and Q&A (2 hours)

- Implementing App Protection Policies for Data Security
- Understanding the Role of Conditional Access Policies
- Interactive Q&A

#### Note:

Breaks of 15 minutes will be provided between sessions in the morning and afternoon, and a lunch break of 1 hour will be scheduled between the morning and afternoon sessions.
